

SPECIALIZED TRADING PROGRAM

F&O Trading Program

Learn futures and options through
structured, risk-aware practice.

15 LESSONS | 60 TOPICS

6 Months | Offer Price: Rs. 15,999

Regular Price: Rs. 24,999 | GST included

Financial Literacy is Everyone's Right.

Educational program. Derivatives involve substantial risk.

Build an F&O decision framework

A six-month program covering market structure, technical analysis, futures, options, Greeks, option-chain interpretation, strategies, testing and risk control.

15 STRUCTURED LESSONS

A progressive path from derivatives foundations to trading plans and assessment.

60 FOCUSED TOPICS

Four selectable video topics per lesson with written guidance.

84 QUIZ QUESTIONS

Lessons 1-14 include six syllabus-aligned MCQs each.

50-QUESTION FINAL EXAM

Lesson 15 concludes with a comprehensive exam. Passing score: 80%.

WHO THIS PROGRAM IS FOR

Learners seeking structured futures and options education

- Learners who want derivatives foundations before using strategies.
- Traders seeking price, volume, OI and option-chain context.
- Market participants who want defined rules for entries, exits and position size.
- Learners ready to practise through assignments, paper trades and review.

Learning approach

Market context -> chart evidence -> price-volume-OI interpretation -> instrument selection -> defined risk -> paper practice -> journal and review. The program teaches educational frameworks, not tips, calls or guaranteed outcomes.

Market and Technical Foundations

Every lesson contains four focused video topics, written guidance and a practical assignment.

01

Financial Markets and F&O Foundations

Indian market structure and participants | Cash market versus derivatives | Futures and options overview | F&O terminology and contract specifications

02

Candlestick Analysis

OHLC and candlestick anatomy | Single-candle patterns | Multiple-candle patterns | Context and confirmation

03

Trends, Support and Resistance

Market trends and phases | Support and resistance | Trendlines and channels | Breakout, false breakout and retest

04

Chart Patterns and Price Action

Reversal patterns | Continuation patterns | Gaps and price behaviour | Multi-timeframe analysis

05

Volume, Open Interest and Market Positioning

Volume analysis | Open-interest fundamentals | Price-volume-OI interpretation | Buildup and unwinding

Futures, Options and Market Data

Every lesson contains four focused video topics, written guidance and a practical assignment.

06

Technical Indicators

Moving averages and VWAP | RSI and divergence | MACD, ADX and momentum | ATR and volatility

07

Futures Trading

Futures pricing and margin | Contract selection and rollover | Futures intraday setups | Futures swing setups

08

Options Foundations

Calls, puts and strikes | Moneyness | Premium and value | Expiry, settlement and liquidity

09

Option Greeks

Delta | Gamma | Theta | Vega and implied volatility

10

Option Chain, PCR and OI Analysis

Reading the option chain | Strike-wise OI | PCR and sentiment | Inferring zones and writing activity

Strategies, Systems and Risk

Every lesson contains four focused video topics, written guidance and a practical assignment.

11

Option-Buying Strategies

Direction, strike and expiry | Call and put setups | Momentum and breakout buying | Managing decay and exits

12

Option-Selling Strategies

Selling foundations and margin | Covered call and cash-secured put | Credit spreads | Adjustments and exits

13

Multi-Leg Option Strategies

Vertical spreads | Straddles and strangles | Iron condor and iron butterfly | Calendar and ratio spreads

14

Screeners, Backtesting and Trading Systems

Intraday opportunity screening | Swing opportunity screening | Using and creating screeners | Backtesting and rule-based systems

15

Risk Management, Psychology and Final Assessment

Position sizing and stops | Trading psychology and discipline | Complete trading plan | Revision and assessment readiness

LEARNING OUTCOMES

What you will learn to build

The goal is a repeatable F&O learning and decision process supported by evidence, defined risk and documented review.

MARKET READING

Interpret structure, trend, levels, patterns, volume and multi-timeframe context.

FUTURES FRAMEWORK

Understand pricing, margin, rollover, mark-to-market and intraday or swing setups.

OPTIONS MECHANICS

Work with calls, puts, moneyness, premium, expiry, liquidity and settlement.

GREEKS AND CHAIN

Interpret Delta, Gamma, Theta, Vega, IV, OI, PCR and bid-ask spread.

STRATEGY DESIGN

Study buying, selling and multi-leg strategies with payoff and risk awareness.

RISK AND REVIEW

Apply sizing, stops, trading plans, backtesting, journaling and assessment.

ASSESSMENT AND CERTIFICATION

Practice, test and review

Lessons 1-14: six-question quiz and practical assignment. Lesson 15: 50-question final exam. Minimum passing score: 80%. Certificate eligibility is subject to the platform's completion and assessment rules.

F&O TRADING PROGRAM

**Understand the contract.
Define the risk.
Follow the process.**
