

FLAGSHIP TRADING PROGRAM

Trading Mastery Program

Build a structured, evidence-based and risk-aware trading process.

24 LESSONS | 120 TOPICS

6 Months | Offer Price: Rs. 27,999

Regular Price: Rs. 39,999 | GST included

Financial Literacy is Everyone's Right.

Educational program. Market participation involves risk.

From scattered signals to a trading system

A six-month learning journey covering market reading, technical frameworks, strategy construction, derivatives, risk control, psychology and performance review.

24 STRUCTURED LESSONS

Progress from foundations to analytical tools, strategies, planning and professional review.

120 FOCUSED TOPICS

Five focused topics per lesson for clear, progressive understanding.

230 QUIZ QUESTIONS

Lessons 1-23 include ten syllabus-aligned questions each.

60-QUESTION FINAL EXAM

Lesson 24 concludes with a comprehensive exam. Passing score: 80%.

WHO THIS PROGRAM IS FOR

Committed learners seeking a disciplined trading framework

- Learners who want strong foundations before applying advanced technical tools.
- Traders who want confluence-based analysis instead of isolated indicators.
- Market participants seeking practical risk, testing and review processes.
- Learners ready to build a written plan and improve discipline through journaling.

Learning approach

Concept clarity -> market context -> confluence -> written rules -> historical testing -> controlled practice -> journal and review. The program teaches educational frameworks, not tips, calls or guaranteed outcomes.

Foundations and Market Reading

Every lesson contains five focused video topics, detailed written guidance and a practical assignment.

01

Trading Mindset & Foundations

Traders vs investors | Fear, greed and discipline | Realistic expectations and goals | Trading vs investing capital | Trading journal habit

02

Market Structure Deep Dive

Accumulation to markdown phases | Liquidity and market depth | Level 2 order book | Market makers vs retail | Institutional price movement

03

Candlestick Reading Mastery

Candle body and wicks | Single-candle patterns | Two-candle patterns | Three-candle patterns | Context over candle shape

04

Chart Patterns & Trend Structure

Higher highs and lower lows | Continuation patterns | Reversal patterns | Trendlines and channels | False-breakout filters

05

Support, Resistance & Price Action

How zones form | Horizontal vs dynamic levels | Support-resistance role reversal | Price-action confirmation | Entries at key levels

06

Volume Analysis

Volume confirms or denies price | Volume spikes | VPT and OBV basics | Accumulation and distribution | Volume-based confirmation

07

Trend-Following Indicators

SMA vs EMA | Golden and Death Cross | MAs as dynamic levels | ADX trend strength | Multiple-MA confirmation

08

Momentum Indicators

RSI and divergence | MACD signals and histogram | Stochastic basics | Bullish and bearish divergence | Reducing false signals

Advanced Analysis and Strategies

Every lesson contains five focused video topics, detailed written guidance and a practical assignment.

09

Combining Indicators into a System

Limits of single indicators | Trend-momentum-volume confluence | Avoiding indicator overload | Three-indicator checklist | Backtesting combinations

10

Advanced Fibonacci Trading

Retracement psychology | Extensions for targets | Fibonacci confluence | Fibonacci time zones | Trend and price-action alignment

11

Elliott Wave Theory

Five-wave impulse and ABC correction | Wave personality | Zigzag, flat and triangle | Counting rules and mistakes | Fibonacci wave targets

12

Volume Spread Analysis Theory

Wyckoff foundations | Spread and volume | Smart-money footprints | No demand, no supply, stopping volume | Entry and exit confirmation

13

Supply and Demand - Advanced Theory

Fresh vs tested zones | Rally-base-drop and drop-base-rally | Zone strength factors | Multi-timeframe alignment | Liquidity concepts

14

Intraday Trading Strategies

Opening-range breakout | Gap-up and gap-down approach | VWAP strategy | Scalping suitability | Intraday risk and timed exits

15

Swing Trading Strategies

Daily-chart setups | Multi-day breakouts | Pullback entries | Holding through volatility | Trailing-stop exits

16

Positional & Trend Trading

Multi-week and monthly trends | Sector rotation | Fundamentals with technical entries | Long-horizon position sizing | Scaling in and out

Derivatives, Risk and Professional Practice

Every lesson contains five focused video topics, detailed written guidance and a practical assignment.

17

Options Trading Basics

Calls, puts, strikes and premiums | Delta, Theta, Gamma and Vega | Option-chain reading | Intrinsic vs time value | Beginner mistakes

18

Options Strategies

Covered calls and protective puts | Bull call and bear put spreads | Straddles and strangles | Stock-position hedging | Defined vs undefined risk

19

Futures Trading & Hedging

Contract specifications and expiry | Margin and mark-to-market | Index-futures portfolio hedge | Basis and rollover | Speculation vs hedging

20

Risk Management Mastery

Fixed-percent and volatility sizing | The 1-2% risk rule | Structure-based stops | Risk-reward optimisation | Correlation and portfolio risk

21

Building a Trading Plan

Trading style and edge | Written entry, exit and sizing rules | Pre- and post-market routines | Scaling position size | Plan refinement

22

Backtesting & Strategy Validation

Why testing matters | Manual historical testing | Testing tools and platforms | Survivorship and lookahead bias | Forward testing on demo

23

Trading Psychology & Discipline

Revenge trading | Overtrading and FOMO | Managing losing streaks | Rule-based emotional discipline | Psychology journaling

24

Performance Review & Going Professional

Win rate, expectancy and drawdown | Monthly and quarterly reviews | Fixing performance leaks | Responsible capital scaling | Continuous learning

LEARNING OUTCOMES

What you will learn to build

The objective is a repeatable learning and decision process supported by evidence, risk control and regular review.

MARKET CONTEXT

Read trend, phase, structure, liquidity, volume and key price levels before choosing a setup.

CONFLUENCE FRAMEWORK

Combine trend, momentum, volume, Fibonacci, VSA and supply-demand without indicator overload.

MULTI-HORIZON STRATEGY

Understand intraday, swing and positional approaches with appropriate entries and exits.

DERIVATIVES AWARENESS

Learn core options and futures mechanics, defined-risk strategies and hedging concepts.

RISK-FIRST PLANNING

Define position sizing, structural invalidation, risk-reward and correlated portfolio exposure.

PROFESSIONAL REVIEW

Use backtesting, forward testing, journaling, expectancy and drawdown to refine a written plan.

ASSESSMENT AND CERTIFICATION

Practice, test and review

Lessons 1-23: ten-question quiz and practical assignment. Lesson 24: 60-question final exam. Minimum final-exam passing score: 80%. Certificate eligibility is subject to the platform's completion and assessment rules.

TRADING MASTERY PROGRAM

**Build your process.
Protect your capital.
Review your evidence.**
